

About Evan

Evan Kenny is an interaction design student from Ireland. In 2022 he got an iPod, and noticing the lack of UI themes for Rockbox with good user experience, began making his own. For over two years, he has put hundreds of hours into crafting the best user experience possible with Themify 2. Both designing and programming by hand himself, with a determined focus on quality and usability. Themify 2 is a reflection of his values as a designer. His hope is that through Themify, more people will return to these devices and keep using them for years to come
